

# Size chart for our short-sleeve cycle jerseys and bibshorts

Choosing the correct size cycle clothing is important as it guarantees top performance of our garments: comfort, insulation, breathability and ease of body movement.

Most women will be able to choose our kit, based largely on their 'dress size'. This is simply a case of selecting S,M,L etc, which have been cross referenced with the European dress size. There is leeway across the sizes to get a neater or larger fit, depending on what you prefer.

You can compare the measurements of our Pretty Gritty cycle jersey against your own well fitting, cycle jersey. We've provided measurements of key areas.

Particularly for the bibs, bare in mind the nature of the stretchy materials used in this type of technical wear and compare the measurements to another pair of bibs, rather than your body measurements.

ALL MEASUREMENTS IN CMS LAY YOUR EXISTING GARMENT FLAT TO COMPARE MEASUREMENTS	S 8-10	M 10-12	L 12-14	XL 14-16	2XL 16-18	3XL 18-20
